Juara 2 Bidang IOT Inovasi Elektro Expo POLINES

# Tharixs Akbar Ibnu Azis

Android Developer

Jember, Jawa Timur, Indonesia

## Ringkasan

As an Undergraduate at Politeknik Negeri Jember, specializing in Teknik Informatika, I have a strong passion for app development, particularly as an Android developer. My expertise extends to programming for Internet of Things (IoT) applications using Arduino, and I seamlessly integrate it into mobile apps.

To further enhance my IT knowledge, I am currently participating in the Independent Study Program as an Android Developer at Bangkit. This program has provided me with invaluable practical experience and exposure to real-world challenges in the field.

With my academic background in Teknik Informatika, my enthusiasm for Android app development, and my proficiency in IoT programming, I am well-equipped to contribute effectively to any team or organization. I am eager to leverage my skills and passion to create innovative and user-friendly mobile applications.

I am actively seeking opportunities where I can apply my expertise, contribute to the growth of an organization, and further develop my skills as an Android developer. If you are looking for a dedicated and knowledgeable professional in this field, I would be thrilled to discuss potential collaboration and demonstrate my abilities.
